#### Scope

The journal publishes articles in all fields of Tropical biology and conservation. Selection criteria are the amount of new information, quality and interest to a general readership. Studies with a strong experimental design, prolonged field work and taxonomic-systematics studies of whole groups are typical of the type of papers that are accepted, while preliminary studies and highly specialized reports are not.

#### Why submit?

Manuscripts are judged solely on the criteria of quality and pertinence, and sent to three independent reviewers. Authors receive digital reprints free of charge and the articles are published in Internet according to the Open Access Initiative.
