The **Revista de Biología Tropical** has been published without interruption since 1953, has worldwide distribution and a high *Science Citation Index* rating. Issues are published each March, June, September and December. Normally, several supplements are also published each year (not included in subscription).

---

## Scope

The journal publishes articles in all fields of tropical biology and conservation, and is directed to a scientific and technical public. Selection criteria for manuscripts are the amount of new information, quality, and interest to a general readership. Studies with a strong experimental design, prolonged field work and taxonomic-systematic studies of whole groups are typical of the papers that are accepted. We do not publish: studies that only add details or cases to previously known phenomena, preliminary studies, communications, species lists, notes or other short articles, or highly specialized reports of limited interest. We welcome unsolicited review articles that critically review the achievements, controversial aspects and main goals for future research of some particular field of tropical biology and conservation.

## Why submit?

**Fully indexed:** Web of Science, Science Citation Index, Current Contents, Google Scholar, Scopus, Biological Abstracts, Zoological Record and 41 more. **Open Access** (more likely to be cited). For authors: ten first printed **pages free**. **Rapid** publication; widely read in countries with the highest biodiversity, where your article can have the greatest real **impact**. A dedicated staff gives you **personalized treatment**.

---

## INDEXING:

The *Revista de Biología Tropical / International Journal of Tropical Biology and Conservation* is a mainstream scientific journal covered by the following **international indexation systems**:

- **Web of Science**
- **Science Citation Index**

INTERNATIONAL JOURNAL OF TROPICAL BIOLOGY AND CONSERVATION / REVISTA DE BIOLÓGÍA TROPICAL  
**AUTHORS' GUIDE**

---

### **Journal scope**

Our journal publishes feature articles in all fields of tropical biology and conservation. Selection criteria are the amount and quality of new information and interest to a general readership. Studies with a strong experimental design; prolonged field work; or taxonomic-systematic studies of whole groups are considered (new species: only vertebrates). We also welcome quality reviews that critically review what is known and what remains to be done in any field of tropical biology. Notes, short communications, species lists, range extensions, new records and other preliminary, short studies, or highly specialized reports of limited interest are no longer accepted.

### **Format and page charges**

Text must be clear, brief and without repetitions according to CSE norms ([council-scienceeditors.org/](http://council-scienceeditors.org/)). Use International System (SI) units and abbreviations (m, km, kg, ml, s; details in [bipm.org](http://bipm.org)).

Page charges: There is no compulsory page fee for the first ten printed pages. Additional pages will be charged \$50 each. A document that corresponds to the maximum length published free of charge typically has about 5 000 words, two figures and two small tables.

### **Tables**

Avoid very small or very large tables (half a page is usually a good size). Table headings must be brief. Do not use bold font, words completely spelled in upper case or separation lines. All symbols and abbreviations must appear as footnotes.

### **Figures**

Attach sharp photographs at 300 DPI and illustrations at 600 DPI (we accept JPG TIFF, PNG and Photoshop). Very important: all figures must have labels using Helvetica 10 points as their only font type and size (Check our Figures Guide).

### **References**

Present the list of references and citations within the text in APA 6<sup>th</sup> Edition format. We recommend freeware: [zotero.org](http://zotero.org) and [mendeley.com](http://mendeley.com)

### **Stages in manuscript processing**

Manuscripts that follow our scope and format indications are sent to three external reviewers who make recommendations to improve them or qualify them as unacceptable. The second draft is corrected by our staff and returned with instructions to prepare the final version for the printer. The Editorial Board has the final word on acceptance.

### **Legal and ethical requirements**

Follow all format details from a recent issue or check examples in [biologiatropical.ucr.ac.cr](http://biologiatropical.ucr.ac.cr). Include a submission letter (download letter from journal website). Include the names and e-mail addresses of three possible objective reviewers, and attach to your manuscript the scanned submission letter, signed by all coauthors:

### **Submit via [revistas.ucr.ac.cr/index.php/rbt](http://revistas.ucr.ac.cr/index.php/rbt)**

Contact us if you do not receive the automatic submission reception message.

## **ETHICS**

When authors submit a manuscript they legally imply that they followed all pertinent legislation and ethical principles (including informed consent and proper treatment of nature according to UNESCO Recommendation on Science and Scientific Researchers; Committee on Publication Ethics and Helsinki Ethical Norms, [onlineethics.org](http://onlineethics.org)); that all coauthors participated in the main aspects of research and agree to publication; and that the study is original; scientifically valid; has not been published before, and was not sent simultaneously to another journal. You share non-exclusive printed and electronic publication rights with the Journal and that you accept to comply with all Journal norms regarding procedure, format, decision, and other pertinent aspects; that you understand that only ten printed pages are published for free (additional pages cost \$50 each).

Board and staff members can publish in the journal but are excluded from all decisions regarding their manuscripts. Authors, reviewers, board members and staff must report conflicts of interest as soon as they arise. Any cases of error, citation manipulation, piracy, plagiarism, duplicate submission, republication, fabrication or falsification of data, and financial conflict must be informed to the Editorial Board, which will investigate them even if the report is from anonymous sources. Articles found in fault can be rejected, retracted or be added errata.

## **MANUSCRIPT PROCESSING AND TRANSPARENCY**

Manuscripts are sent to three external anonymous reviewers who act as referees and include an ethics assessment in their opinion (we apply plagiarism software to all manuscripts). Neither authors, nor reviewers, know each other identities (i.e. doble blind). The evaluation forms are public ([vnielsen.rbt@gmail.com](mailto:vnielsen.rbt@gmail.com)).

The decision of acceptance or rejection rests with the Editor, who is based on the opinions of referees and is backed by the support of an Editorial Board and an International Scientific Board. Authors can appeal Editor's decisions once to the Editorial Board and that decision is final. Board meeting proceedings are stored in the University Archive as public documents.

The journal publishes about 130 articles per year, not including the occasional supplements. The rejection rate is 28 % *ad portas* and 38 % after peer review (2018 data).

Considering both boards, 82 % of members are external to the publishing institution and foreign authors and institutions represent 78 % of articles in normal issues and 12 % of supplements (2018 data). All processing is documented in OJS.

## **OPEN ACCESS, COPYRIGHT AND DATA TRANSPARENCY**

Copyright is shared by the authors and the journal; contents can be reproduced if the source and copyright are acknowledged, according to the Open Access license. Self-storage in preprint servers and repositories is allowed for all versions. We encourage authors to publish raw data and data logs in public repositories and to include the links since the first draft so that reviewers and readers can consult them at any time. Blogs with comments and a Forum section that allows reply articles are available to readers in our website.

The journal is financed by public funds via the Universidad de Costa Rica and editorial independence and ethical compliance are guaranteed by SIEDIN norms (<https://bit.ly/2Dwyg36>); we do not publish paid adds or receive funds from companies.

<https://revistas.ucr.ac.cr/index.php/rbt/about>

## IMPORTANT

We have improved our abstracts to help readers rapidly understand why a paper is important, and what the authors wanted to achieve, how they did it, and what they found.  
Please conform your abstract to this example\*

**ABSTRACT.** **Introduction:** Interspecific interactions among tropical mesocarnivorous species and other mammalian trophic guilds have been poorly studied, despite their important implications in the survival, structure, demography, and distribution of these species. **Objective:** To analyze if sympatric mesocarnivores coexist or compete in the axis of the temporal and spatial niche. **Methods:** From January 2015 to December 2016 we recorded mammals with 26 stations of camera traps (in pairs, facing each other) along roads and animal trails, at Reserva de la Biosfera El Cielo, Tamaulipas, Mexico. We calculated temporal and spatial overlaps with the Czekanowski and Pianka indices. **Results:** We obtained 239 margay, 118 ocelot and 22 yaguarundi records. Margay and ocelot were nocturnal (75 % of their records) and had a high temporal overlap (0.85); whereas yaguarundi was fully diurnal, suggesting it may be able to coexist with the other two species. The three species used similar habitats: yaguarundi had 0.81 spatial overlap with margay and 0.72 with ocelot; spatial overlap between margay and ocelot was intermediate (0.53). **Conclusions:** There is no interspecific competition among these tropical mesocarnivores, probably due to antagonistic interactions leading to use of different parts of the temporal and spatial axes.

- \* Sample based on *Interacciones temporales y espaciales de mesocarnívoros simpátricos en una Reserva de la Biosfera: ¿coexistencia o competencia?* By R. Carrera-Treviño, et al. (*Revista de Biología Tropical* 66, 3 (2018): DOI 10.15517/rbt.v66i3.30418

---

## IMPORTANTE

Hemos mejorado nuestros resúmenes para ayudar a los lectores a entender rápidamente por qué un artículo es importante, y lo que los autores querían lograr, cómo lo hicieron, y qué encontraron.

Por favor escriba su resumen según este ejemplo\*

**RESUMEN.** **Introducción:** Las interacciones entre especies de mesocarnívoros tropicales y otros gremios tróficos de mamíferos han sido muy poco estudiadas, a pesar de sus importantes aplicaciones en la supervivencia, estructura, demografía, y distribución de estas especies. **Objetivo:** Analizar si los mesocarnívoros simpátricos coexisten o compiten en el eje del nicho temporal y espacial. **Métodos:** De enero 2015 a diciembre 2016, registramos mamíferos con 26 estaciones de cámaras trampa (en pares, una frente a la otra) a lo largo de caminos y veredas, en la Reserva de la Biosfera El Cielo, Tamaulipas, México. Calculamos el traslape temporal y espacial con los índices de Czekanowski y Pianka. **Resultados:** Obtuvimos 239 registros de margay, 118 de ocelote y 22 de yaguarundi. El cauzel y el ocelote son nocturnos (75 % de sus registros) y mostraron un alto traslape temporal (0.85); mientras que el yaguarundi fue totalmente diurno, sugiriendo que puede coexistir con las otras dos especies. Las tres especies usaron hábitats similares: el yaguarundi tuvo un traslape espacial de 0.81 con el cauzel y de 0.72 con el ocelote; el traslape espacial entre el cauzel y el ocelote fue intermedio (0.53). **Conclusiones:** No hay competencia interespecífica entre estas especies de mesocarnívoros tropicales, probablemente debido a interacciones agresivas que conducen al uso de partes diferentes de los ejes temporal y espacial.

- \* Ejemplo basado en *Interacciones temporales y espaciales de mesocarnívoros simpátricos en una Reserva de la Biosfera: ¿coexistencia o competencia?* Por R. Carrera-Treviño, et al. (*Revista de Biología Tropical* 66, 3 (2018): DOI 10.15517/rbt.v66i3.30418
